

Education

UCSD Extension - Sep 2022 Full Stack Web Development Bootcamp Certificate

Projects

Burauza no Akachan (Browser Babies) | richmondddz.github.io/BURAUZA-NO-AKACHAN

- A homage to Tamagotchi, working with my group, we aspired to create a game where the player can nurture and care for a pet.
- Utilized HTML, CSS, the retro gaming stylesheet Nes.CSS, and JavaScript along with APIs like moment.js
- Styled the front end with Nes.CSS with the aim of providing a retro, 8-bit gaming interface

Rllr-Decks | <https://project2-rllr.herokuapp.com/>

- A forum where people can post and comment in threads and discuss anything pokemon.
- Using multiple technologies like bcrypt for user authentication and mysql2 for data persistence
- Architected database schemas for application that connects a user to a collection of available Pokemon
- Linked the server to the main app using sequelize and mysql2—> change to hosted on Heroku Hosted application to Heroku

Daily Planner | <https://richmondddz.github.io/Work-Day-Scheduler/>

- A simple to use daily planner that adjusts in real time according to the hours of a 9-5 shift.
- Integrated third party API moment.js to handle real time adjustments to color scheme when it hits the next hour
- Utilizing local storage, when the save button is clicked any note written will be saved until deleted

Employment

Rady Children's Hospital - Jan 2022 - Current | Pharmacy Technician

- Oversee medication shipments to patient homes, confirming 100% of all packages are prepared and ready for shipping
- Implemented organization of prescriptions, creating a smoother operation of medication to patient hand off and pick up

Omnicare - Nov 2018 - Dec 2021 | Lead Pharmacy Technician

- Directed the team on the day to day operations
- Worked in tandem with the pharmacist in charge and manager on company productivity resulting in an increase of customer service by 40%
- Consulted with customers on our daily shipments ensuring all required medication would arrive on site on time
- Trained new technicians on processing orders received from doctor offices which then developed a decrease in prescription errors
